IDOT Pavement Repair Projects in Mundelein Area

MUNDELEIN, IL – June 19, 2009 – The Illinois Department of Transportation will begin work on pavement repair projects in or around Mundelein starting the week of June 22nd.

The first of the Pavement Preservation Projects is the resurfacing of IL Rt. 60 between IL Rt. 120 in Volo to IL Rt. 176 in Mundelein. Since IL Rt. 60 is primarily a two lane highway, it will often be reduced to one lane as the other lane is worked on. Traffic delays are to be expected.

The second project is the resurfacing of US 45 (Lake Street) between Allanson Road and just south of the intersection of IL 83 – IL 60 – US 45 (Journey's End). This work is expected to begin shortly after July 4th. Daytime reductions from 4 to 2 lanes is expected and traffic delays are likely.

The contractor for both projects is Curran Contracting.

The Mundelein Public Works Department will be monitoring the work continuously in order to safeguard Village infrastructure.

Please contact IDOT with any questions at 847-705-4000 or Bill Emmerich, Village Engineer at 847-949-3220.
